- Selected Domain – #2
- Problem Statement – Sustainable use of electricity, a common problem faced by people , they are not aware of how much power they really consume and how much the electricity they really use wisely.

TEEN TITANS

DOMAIN PROBLEM IN OUR WORDS

GENESIS

Sustainable use of electricity, a common problem faced by people , they are not aware of how much power they really consume and how much the electricity they really use wisely.

We use electricity on a daily basis , but we never understand how we receive such a high bill at the end of the month. Our solution gives clarification on this by letting us know how much electricity we consume on a daily basis , where most of it is getting used and how we can use it efficiently. Our solution not only gives data but also useful insights from it to improve electricity usage.
